

BC. TOMÁŠ CHRAPOVIČ

☎ +421 949 216 600

✉ chrapovic.tomas@gmail.com

I am a Computer Science student with an open-minded approach to new knowledge and challenges. I am looking for an opportunity to gain my first professional experience, broaden my horizons, and grow through practical application. I am characterized by responsibility, reliability, independence, and a strong willingness to learn new things

EDUCATION

High School

Cirkevné gymnázium sv. Cyrila a Metoda v Snine
(2018 - 2022)

Bachelor's Degree (Informatics)

Technical University of Košice
(2022 - 2025)

Master's Degree (Informatics)

Technical University of Košice
(2025 - present)

PROJECTS

Dynamic Liquid Morph

Web Graphic Application

- Physics system based on the mass-spring model, providing real-time response to user input.
- Enables seamless modification of the object's material and geometric properties.
- Technologies: WebStorm, JavaScript.

Bachelor thesis

Optimization of Post-Quantum HQC Cipher

- Analysis of post-quantum cryptography and implementation of the HQC (Hamming Quasi-Cyclic) cryptographic algorithm.
- Optimization of key mathematical operations.
- Technologies: C++, Latex

GameJam projekt

3D Game Development

- 2nd place in the school GameJam competition.
- Developed a 3D game in a team within a 48-hour timeframe.
- Focused on team collaboration, level design, and game logic.
- Technologies: Unity, C#.

Poke-tracker

Web application for tracking Pokemon TCG collections.

- View your total collection value, total investment, and calculate your overall profit or loss.
- Built-in web scraper using Puppeteer and Cheerio to fetch the latest market prices from TCGPlayer URLs.
- Secure user login and registration powered by NextAuth.js.
- Technologies: Next.js, Prisma, SQLite, NextAuth.js ...
